

CASE STUDY

Micron Biomedical

Modernizing ERP for Life Sciences Growth

Micron Biomedical needed a modern ERP solution to replace an outgrown QuickBooks system and support its growing life sciences operations. By implementing NetSuite Financials First Standard, Micron Biomedical gained improved financial visibility, structured approval workflows, and a scalable platform to support future growth—successfully going live in September 2024.

- Expense Report Approval Workflow
- Time Entry Approval Workflow
- PDF Layout (Purchase Order, Sales Order, Customer Invoice, Customer Statement)

Project Start: April 8, 2014**Go-Live Date:** September 1, 2024

► Why did they decide to implement NetSuite?

Micron Biomedical is a clinical-stage life science company committed to expanding access to vaccines and therapeutics globally. With a need to ramp up inventory production they knew that QuickBooks would not fit all of their needs. Implementing a system like NetSuite would allow for growth, more control, and the advanced capabilities that they would need.

► Initial Goals and Objectives of the Project

- Set a global chart of accounts and segment structure that would allow them to scale and report more effectively
- Increase internal controls across the business using SuiteFlow to allow for approvals in purchasing, time entry, and throughout the general ledger
- Prepare for production readiness with the ability to add on inventory and manufacturing in future phases of building out their NetSuite instance

➤ Goals and Objectives Achieved

- Went live on-time
- Implemented internal controls across the business using SuiteFlow for vendor management, purchasing, the general ledger and employee time reporting
- Leveraged NetSuite's automated visuals to replace outdated snapshots, empowering cash burn forecasts to extend pre-revenue runway

We were pleased with our experience with Centium during our NetSuite ERP implementation. Our dedicated project manager Jon Keyes established an implementation timeline and structure that was easy to follow. He scheduled weekly meetings to ensure the implementation was on schedule and was also flexible when we needed additional assistance. The consultant we worked with Ryan Regan has extensive knowledge and experience with NetSuite and was very helpful in facilitating the implementation and even held some individual training sessions to ensure that employees were able to successfully utilize the system at go-live date. The high level of communication exemplified throughout the process was critical to our successful implementation. I would definitely recommend Centium to any organization looking to implement NetSuite as their ERP system.
