

CASE STUDY

RedRidge Bio, Inc.

Powering Global Growth with NetSuite OneWorld

RedRidge Bio, Inc. needed a scalable ERP solution to support its life sciences operations across the U.S. and Europe while strengthening financial controls. By implementing NetSuite Financials First Standard with OneWorld and SuiteProjects, RedRidge Bio gained improved global visibility, multi-entity management, and structured approval workflows—successfully going live in July 2025.

- Time Entry Approval Workflow
- Customer Invoice Approval Workflow
PDF Layout (Purchase Order, Sales Order, Customer Invoice, Customer Statement)

Project Start: February 24, 2025**Go-Live Date:** July 1, 2025

► Why did they decide to implement NetSuite?

RedRidge Bio are leaders in the identification and development of biparatopic antibodies, designed to deliver exceptional efficacy across a range of disease areas, including oncology and autoimmunity. Outgrowing their Switzerland specific accounting software and the need to develop internal controls and segregation of duties they decided to move to QuickBooks based on a recommendation from an existing client. NetSuite would provide them the global capabilities they'd need for consolidated reporting, intercompany processing, project accounting, and time entry.

► Initial Goals and Objectives of the Project

- Set a global chart of accounts and segment structure that would allow them to scale and consolidate in a multi-currency environment
- Compliance with Swiss payment regulations
- Enhanced Project Accounting for R&D
- Strengthen internal controls to prepare for potential future sale or IPO

➤ Goals and Objectives Achieved

- Global consolidated multi-currency reporting along with statutory reporting using multi-book
- Swiss payment compliance using Atlar's 3rd party add-on to minimize running different types of payment processes
- Added several control processes using SuiteFlow for transactions approvals

Centium executed our NetSuite project with precision, and their ongoing support keeps us optimized and excited for even greater operational improvements ahead.
